

NATURE PLAY RECIPE CARD

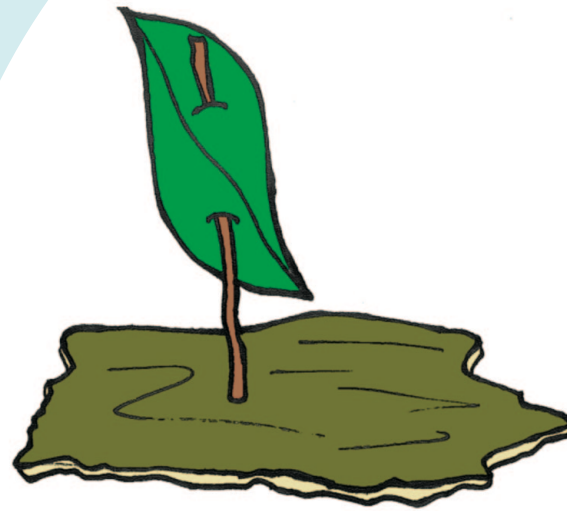

Build a Boat

INGREDIENTS:

- Some bark
- A leaf
- A small stick

METHOD:

- Collect a piece of bark. You can use your hands or a piece of stone to shape it as you wish.
- Put in a stick as a mast.
- Use a leaf as the sail.
- Of you go! Test it out in a pond, your bathtub or bucket
- If you put a string on it you can more easily retrieve it.

SAFETY AND CARE:

- There is always plenty of bark and leaves on the ground, never take them directly from a living tree or plant
- Let adults know if you are going near the water.
- Only go to the edge of the water when launching your boat, then step back once it has launched and watch it sail

Did you know?

Bark canoes have been made traditionally all over the world for thousands of years.
